CRISIS PAST.

Caprivi Weathers a Political Storm.

Germany Disgusted With the Brutality of the Recent Race.

A Cholera Patient Stampedes the Buda Pesth Opera-house.

An Outbreak of the Plague in China Causes a Renewal of Hostilities Against Foreigners—Notes from Abroad.

By Telegram to the Times.

BREITENBURG, Oct. 15.—[Copyright, 1892, by the New York Associated Press.] Not a single journal, except the government organs, supports the Military Bill. The general belief that a crisis is pending in the Prussian cabinet on account of the bill is passing away. At a cabinet meeting the ministry accepted the bill on condition that the extra expenditures should be borne by the Empire and not by Prussia alone.

Von Caprivi's assurances on the point appeared to be satisfactory. The prospect of the bill passing the Reichstag is improved by the report that the government has decided to concede to Parliament the right to fix annually the peace footing of the army.

It is reported that the meeting between Emperor William and the Duke of Cumberland for the purpose of discussing the question of the Brunswick succession fell through, owing to the Queen of Hanover persuading the Duke not to attend. Queen Victoria advises the Duke to release his claim to the throne. The Duke is in a quandary.

THE RECENT RACE NOW DENOUNCED.
The Australian military riders have returned to Vienna, leaving about half their horses dead or disabled. The German riders fared little better. Enthusiasm over the race is replaced by moral disgust and the German Humane Society has decided to bring the question before the Reichstag.

A report giving the exports to America from the consular district of Berlin for the quarter shows that they increased \$2,628,550, compared with the corresponding period last year. The increase is mainly due to Hamburg sugar exports and knitted goods.

BERLIN GOSPEL.
A sensation has been caused in the theatrical world by the absconding of Herr Junkermann, director of the Neue Deutsche Opera-house, who was heavily in debt.

The Dowager Queen of Wurtemberg is dying from fever.

CHOLERA AND FANATICISM.
The Plague's Ravages in China Increasing the Feeling Against Foreigners.

SAN FRANCISCO, Oct. 15.—[By the Associated Press.] The Hankow correspondent of the Shanghai Mercury writes under date of August 29, at Fanchen, 400 miles from Hankow on the Han River: "Cholera is raging to an awful extent and hundreds are dying daily. Evil disposed persons, hater of foreigners, have spread a malicious report that some Chinese are travelling in the pay of Europeans, poisoning all wells and rivers, hence the awful number of deaths. Consequently all strangers are put in prison and many have had their heads cut off and the entrails and hearts thrown into the river to propitiate the river god."

"Fears are entertained for the safety of Rev. Mr. Lund belonging to the Swedish mission and returning to Hankow, as it is known he will soon, unless he gets the letters sent to warn him, be in the troubled district. If he passes through the city the chances are that he will be killed."

A TERRIFIC STORM.
Shipwrecks on the English Coast and Floods in the Interior.

LONDON, Oct. 15.—[By Cable and Associated Press.] The very severe storm which set in over northern England, Scotland and Wales Thursday night, has been raging since. Waves are down in every direction. Tides of disaster, shipwreck and loss of life are beginning to come in. In all this territory are out of their banks, doing great damage to unharvested crops and flooding low lying towns. In places the country is inundated for miles.

Hundreds of sheep and cattle are in danger of being drowned along the river Derwent. At Durham the railway bridge was swept away. A freight train on the bridge at the time went down. The train hands fortunately escaped. A French lugger is ashore at Guernsey. All the crew were drowned.

PANIC IN A THEATER.
A Case of Cholera Causes the Audience to Flee.

BUDA PESTH, Oct. 15.—[By Cable and Associated Press.] While a performance was in progress in the opera-house here last evening a woman in the gallery suddenly became very ill, and every one in the house attracted by her moans and struggles discovered that she was attacked with cholera. In a very short time the place was in an uproar and a panic ensued. A rush was made for the doors and many made their escape. Many persons were badly bruised. In the meantime the stricken woman was left lying entirely unattended, and it was a long time before she was removed to the hospital.

BRITISH WORKMEN.
They Will Insist on Their Right to Meet in Trafalgar Square.

LONDON, Oct. 15.—[By the Associated Press.] The workmen's clubs and Socialist societies which figured in the Trafalgar riots five years ago will reassert their right to hold a public meeting there by a monster demonstration on Sunday, November 13, with which it is presumed the government will not interfere.

WHITE PLAINS (N. Y.), Oct. 16.—[By the Associated Press.] The ovation tendered Mr. Blaine by the people of this vicinity last evening was a most enthusiastic affair. Mr. Blaine's speech, his first during the campaign, was as follows:

Fellow citizens of New York: I should be churlish indeed if I did not make a response to your call. At the same time I'm not making speeches in this canvass, for a reason which is well known to my friends and which has no connection with politics. Generally the administration in Presidential elections is challenged on account of the conditions of the business of the country, and I submit that the Republican administration of President Harrison can triumphantly endure such tests.

I doubt if since the Government of the United States was instituted anybody at any time has seen what we call good times so general, taking in so many interests and spreading prosperity throughout the whole domain of trade. The opponents of the Republican party always represent New York as a commercial city and not a manufacturing one, but more men in New York get their living from pursuits protected by the tariff than from any other source, and the number of men engaged in commercial affairs in and about New York is smaller than that of the manufacturing class.

Now, if you go west, where the Democrats this year are making considerable efforts and doing a vast amount of boasting, will you find it different? Take Ohio, Michigan, Indiana, take Illinois, and the products of their manufacturers are greater in pecuniary value than the products of agriculture in the agricultural States. So I think when Democratic orators try to arouse the hostility of these States against the protective tariff, they will encounter a sentiment of which they have not dreamed. We learn from the Democratic party that these Western States are in a desperate condition and that the amount of their farm mortgages has risen up into the millions. This is not so among the farmers of any State nearby, whose condition can be easily learned, but by a singular fatality it is the Western States that get all the Democratic propaganda.

Democratic papers say that the tariff is the origin of a plutocracy of money, which is a desperate condition and that the amount of their farm mortgages has risen up into the millions. This is not so among the farmers of any State nearby, whose condition can be easily learned, but by a singular fatality it is the Western States that get all the Democratic propaganda.

POINTS OF THE MORNING'S NEWS.

Gov. Markham's journey east has been stayed by a railroad strike at Denver.

The Consul-General of Ecuador is under arrest at New York for forgery.

San Jose and Oakland were winners in the ball games. The crisis in the Prussian ministry appears to have passed. Cholera has broken out in China and the natives, attributing the disease to foreigners, have become more hostile to Europeans.

A great storm is raging on the English coast. A cholera patient caused a panic in the Buda Pesth Opera-house. The Masonic Grand Lodge of California has installed its new officers.

The Congressional Council continues in session at Minneapolis. The Crow Indian reservation in Montana has been thrown open to settlement. Mrs. Harrison's condition is unimproved.

IN AND ABOUT THE CITY.
The Supreme Court has decided that headings on election tickets are illegal. Suicide of a school teacher at Whittier. Verdict of the coroner's jury in the Chinatown murder. Closing sessions of the Y.M.C.A. State Convention. Doings in society.

News notes from neighboring countries.

There was too much truth, he said, in the rumors that the election of 1888 was bought. There was no way of accounting for the action of the Republican party for the last four years other than by the bargain and sale of legislation. He did not see how any man in his right senses thought it wise to inflict upon the poor the awful burdens of the McKinley bill, or debauch voters by offering them pensions or impoverish taxpayers by buying masses of silver, for which there was no use, or insult a small weak sister Republic like Chile by sending such a diplomat as Patrick Egan, or threatening her with war without waiting to translate her apology.

On the tariff question MacVeagh said that 12 per cent. of the laborers of Pennsylvania could secure employment in the protected industry, while the other 88 per cent. had to pay a bounty on almost everything they eat or wear. Owing to the cordage trust and similar evils the American farmer each year found himself poorer in Ohio and Pennsylvania land is worth less than half it was twenty years ago. Laboring men are obliged to pay artificial prices on sugar on account of our trusts, kept alive by the McKinley bill, and what is true of the McKinley bill and a great group of gigantic monopolies, is also true of reckless pension legislation. The speaker did not object to just pensions. He said he was known that in the present year silver was mined in vast quantities at 33 cents per ounce and sold to the Government at over 70 cents. So it was probable our silver dollar was not worth over 50 cents. It was only a question of time, he declared, when we would be reduced to silver currency.

In closing, the speaker said he had rather pay money into the hands of a burglar, or bribe a watchman to rob a bank than contribute money to be placed in the hands of Quay, Martin or Hackett to be used in politics.

FIGHTING FOR FUSION.
Minnesota Democrats Resorting to Law to Carry out Their Scheme.

CHICAGO, Oct. 15.—[By the Associated Press.] A St. Paul special says that late this afternoon the Democratic State Central Committee began a mass demonstration against Secretary of State Brown to compel him to place the names of nine electors on the Democratic ticket on the Australian ballot.

This Brown has already declined to do on the ground that four of their names were also on Weaver's ticket. Today the Democratic State Central Committee asked the State Supreme Court for a writ of mandamus, but that body refused the request.

Later in the day, however, a writ was issued by Judge Brill of the District Court, compelling Secretary Brown to appear on Monday and show cause why he should not place the names presented by the Democrats on the State ticket as requested.

When the officers appeared to serve the summons Brown and his chief deputy fled and could not be served. Marshals are scouring the State tonight in search of the fleeing State officers.

A New Kind of Fusion.
NASHVILLE (Tenn.), Oct. 15.—J. H. McDowell, one of the People's party State electors at large, in joint debate with Congressman Enloe yesterday admitted openly that the Republicans and People's party representatives in Tennessee had made a combine by which in counties and districts where the Republicans have a majority the People's party candidate shall not run, and where the Democrats have a majority the Republican candidate shall run, but not a People's party man.

Reid Speaks in New York.
NEW YORK, Oct. 15.—H. M. Whitelaw Reid and others addressed the Wholesale Drygoods Republican Club this afternoon. The speeches were mainly devoted to the McKinley law and finances.

A Sop to Woman Suffragists.
CHICAGO, Oct. 15.—The election commissioners have decided that women are entitled to register and vote at the coming election, but for trustees of the State University only.

The Wheat Yield.
MINNEAPOLIS (Minn.), Oct. 15.—Owing to a wet spring, Minnesota, North Dakota and Nebraska raised this year only 100,000,000 bushels of wheat, a falling off of 60,000,000 bushels from last year's phenomenal yield. In the winter wheat States, except Nebraska, the yield has been reduced by drought. Nebraska will yield 22,000,000 bushels.

Indian Lands Open to Settlement.
WASHINGTON, Oct. 15.—The President has signed a proclamation opening to settlement the surplus lands of the Crow Indian reservation in Montana, aggregating 1,800,000 acres. They are open to settlement at once.

A Railroad Strike Checks Gov. Markham's Eastward Journey.

The Aged Consul-General of Ecuador Under Arrest in New York for Forgery—A Woman in the Case.

By Telegram to the Times.

WASHINGTON, Oct. 15.—[By the Associated Press.] The President is very much depressed in spirits at the steady decline of Mrs. Harrison's health. He no longer attempts to give his attention to public affairs. He denied himself to all callers today, and omitted the regular afternoon reception.

At 11 o'clock tonight an Associated Press representative was informed that Mrs. Harrison was resting quietly, the only noticeable change in her condition being that she was less drowsy. Dr. Gardner, after his usual visit this evening, remarked that Mrs. Harrison was about the same as for the past day or two, and there need be no apprehension of a crisis for the present at least. During the early evening the President walked in the park, south of the house, for nearly an hour. Mr. and Mrs. Russell Harrison also went for a walk. In fact, there was no indication of special uneasiness or alarm.

WORLD'S FAIR MATTERS.
The President Cannot Attend—A Nowe Suggestion.

CHICAGO, Oct. 15.—[By the Associated Press.] A telegram was received this morning at World's Fair headquarters from Private Secretary Halford, saying that President Harrison will be unable to participate in the dedicatory exercises. Vice-President Morton will take the place assigned to the President.

NEW YORK, Oct. 15.—The Lyceum League of America, a patriotic organization, is endeavoring to arrange to have one of its members beside the orator at the World's Fair dedication who will touch a button when the word "dedicated" is spoken. This pressure will complete an electric circuit which will raise to the top of a flagstaff on the Netherland Highlands the first Stars and Stripes which the ladies of Philadelphia gave Paul Jones when he sailed away against the British.

HELD IN QUARANTINE.
Minister Lincoln and Victoria Woodhull Under Arrest in New York for Forgery—A Woman in the Case.

NEW YORK, Oct. 15.—[By the Associated Press.] The Etruria arrived this afternoon, but will not reach her dock before morning. The retention over night at quarantine is reported to be due to the refusal of a number of saloon passengers to submit promptly to inspection by the health officer. On board the Etruria are Hon. Robert T. Lincoln, United States Minister to England, and late this afternoon Victoria Woodhull, candidate for President on the Woman's Suffrage ticket. She is accompanied by her husband and by her sister Tenny, who is now Lady Cook.

GOV. MARKHAM DETAINED.
His Progress Eastward Stayed by a Railroad Strike.

DENVER (Colo.), Oct. 15.—[By the Associated Press.] Engineers, conductors, firemen and trainmen on the second and third divisions of the Rio Grande struck today. As a result only mail and express trains are moving. The trouble appears to have originated with the engineers regarding the run, which the men claimed was too long.

The Governor of California and party, en route to the World's Fair dedication, are tied up by the strike.

A DOUBLE LIFE.
Ecuador's Consul-General Placed in a Bad Light.

NEW YORK, Oct. 15.—[By the Associated Press.] Domingo L. Ruise, Consul General of Ecuador, was arrested today on a charge of forgery. He admits having signed the name of Gustave Preston, the vice-consul, to two notes for \$300 each. Ruise, who is age 71, says he gave the money to a woman. The police say she is his mistress, Mrs. Bertha Laws, by name. Preston is a Boston merchant. Ruise has a wife living in this city and has been apparently leading a double life for some time.

Archbishop Satolli's Mission.
WASHINGTON, Oct. 15.—Archbishop Satolli, the papal legate, called on Secretary of State Foster today and presented a letter from Cardinal Rampolla conveying the good wishes of His Holiness. The party then proceeded to the White House, but the President through Secretary Halford conveyed an expression of his regrets that he was unable to give the legate an audience on account of the exceedingly precarious condition of Mrs. Harrison. After an expression of sympathy with the President in his affliction the party withdrew. Satolli, after the close of the World's Fair dedication, will make a trip West, possibly extending it to the Pacific Coast.

The Coming Solar Eclipse.
WASHINGTON, Oct. 15.—Dr. Morris, of the Nautical Almanac Bureau, says that the most important astronomical phenomenon of the year will be the partial solar eclipse on the 20th of this month. If the day is clear it will be visible throughout the whole of North America, except the extreme west of Alaska, and that portion of the continent which lies west of a line drawn from the northwest corner of California to the north shore of the Bay of Tehuantepec, Southern Mexico.

THE FAIR OF FAIRS

At Chicago, October 20, 21 and 22—Our
Columbian Number.

The quadricentennial anniversary of
the discovery of America by immortal
Christopher Columbus will be ushered
in by imposing dedication exercises at
Chicago on the 20th, 21st and 22d of
October.

The Los Angeles Times has fixed upon
this historic and glorious date for the
issuance of a special illustrated COLUMBIAN
NUMBER. It will consist of twenty-four
pages, besides a four-page illustrated
supplement, showing the California
building, the other World's Fair
buildings, and Los Angeles local views.

The city and county of Los Angeles
and the other southern counties will be
adequately described, their resources
and advantages truly depicted.
Brilliant and graphic reports from
the center of interest, Chicago, will be
published. There will be an elaborate
map description of the buildings and
grounds and of the imposing prepara-
tions for 1893; also a luminous special
telegraphic report of the opening dedi-
cation exercises on the 20th inst. A
second edition will contain also the
impressive proceedings, on the 21st, of
what will doubtless prove one of the
most notable gatherings in the history of
America.

For a partial mention of special fea-
tures see large advertisement.

The rockets glared gold and red last
night.

Pack's figures are holding their own
with remarkable success.

GENERAL PROSPERITY is grand marshal
of the Republican national parade.

MAN wants but little here below, but
most of the time he don't get even that
much.

MR. SPEARS of Coffeyville would be a
good man to settle those county seat
wars in Kansas.

The day of vest-pocket ballots has
gone by. The voter now-a-days lugs his
ticket in under his arm.

CHICAGO ought to turn that big search
light onto its hotel highways and
back-driving train robbers.

PERHAPS the Examiner has a reporter
it can spare to dig up an authentic pic-
ture of Christopher Columbus.

AS LONG as those fellows down South
keep haunting the bloody trail, guess
we'll have to keep the North solid.

WHEN one remembers Chicago's fall-
ing as to "feet," he will perhaps regret
why that Monroe ode is so awfully
off.

THE buzzards up the bay must miss
Grover even now; but wait until after
election and they will wait hanker
after him.

CHICAGO has at last adopted a distinc-
tive color. It is the exact shade of a
slaughter-house at the close of a hard
day's hog butchering.

WEATHER went South to scatter har-
mony broadcast through the land, but
found out that the populace down there
wouldn't have it without egg sauce.

EVIDENTLY Secretary of State Waite
is not a candidate for reelection, as
there is a \$2000 a year place at the
capital which he proposes to leave vac-
ant.

AN Eastern admirer of Grover calls
him "the Cincinnati of American politics."
The probable reason for that is
that the prophet wouldn't know a plow
if he saw one.

JUST as we expected, John Philip
Sousa thinks he was the Marine Band,
and is giving his Chicago tooters that
title. Sousa will probably move the
Capitol over to Chicago if let alone.

THE superintendent of a San Fran-
cisco orphanage is in the toils for ad-
ministering teaspoonful doses of
cayenne pepper as correctives to some
of his charges. It is a burning ques-
tion, with the superintendent on the
wrong end of the bar.

being taxed for the maintenance of the
"manufacturing bureau," really receive
a bonus for encouraging home in-
dustries. The American people do not
pay too dearly for the luxury of sus-
taining home industries, when, by a few
years of such encouragement, they
place themselves in the way of securing
better articles at a less price than ever
before. All the money which they may
pay in a direct tax is returned to them
many fold in the lessened price of sub-
sequent purchasers, and they have the
stimulated prosperity of the entire
country as an indirect advantage. It
pays the largest kind of a dividend to
stand by home industries.

He Is Simply a Brute.

The Kansas City Star, which is pub-
lished in a section that has had prac-
tical experience with the James and
Younger and Dalton breed of outlaws,
wastes no sentiment on that kind of
cattle. An opinion expressed in its col-
umns recently reinforces our position
so effectively that we take pleasure in
quoting it. The Star says:

The men of Coffeyville seem to have
had no spark of romantic feeling in the
matter. Mr. Jim Speers, the liveryman,
who was stung and "pumped" by his
Winchester, does not seem to have
known or cared whether the thieves
resembled in any way "bandits from the
storied Oldenwald." The citizens
who defended their lives and property
seemed to be indifferent also to ancient
biography and history, and did not stop
to inquire what "burning wrongs" may
have driven the Daltons to stealing and
murdering for a living. The career
of the robbers was ended, as one may
say, in "good shape." There were
no surrenders, no negotiations, no
treaties about it. There was no sheriff
and posse in eternal "hot pur-
sue." What the brave men of North-
field did to the Younger gang the brave
men of Coffeyville did to their relatives,
the Daltons. Now, if there are tears to
be shed let them fall for the honest men
who were slain, and let the rewards
which have been offered for the appre-
hension of the robbers be paid to the
widows and children bereaved in this
tragedy; and let young fellows who
may have been affected by the columns
and pages that have been published for
several years past about "knightly"
and "chivalric" thieves and robbers un-
derstand that it is all slush and rot, and
that every robber is a brute who de-
serves and generally receives the fate
of extermination.

False Charges.

Our Democratic contemporary, the
Herald, seems to have no more exalted
idea of making a lively local campaign
than to bring all sorts of reckless
charges against Republican county offi-
cials. It recently attacked County
Clerk Ward for discriminating against
Democrats in the appointment of
deputies for registration. As a matter
of fact, Mr. Ward has been absolutely
fair, and even generous, in all matters
which call for non-partisan action.

The Democratic County Central Com-
mittee, who are the best judges of his
action in this respect, have nothing
to say against him. He has
extended to them every courtesy
that they have asked, and they
are not at all backward about
saying so.

The Democratic Central
Committee has as much interest in the
success of the party as the Herald, but
they believe in making a fair, open
fight, and they will not countenance
misrepresentation in campaign work.

The Herald stands alone in this respect,
and it seems to think that the refutation
of a lot of false accusations will
serve the purpose as well as anything
else. The Herald is again on the
wrong track.

The murder of the little native Cal-
ifornian boy, Fernando Quijada, has
naturally aroused great indignation
among his countrymen, whose abhor-
rence and resentment have been aroused
to a high pitch. A moderate and just
view of the case is, however, the duty
of the hour. The murder was com-
mitted by a Chinaman, but it would be
unjust to hold the Chinese generally re-
sponsible for the crime. The Chinese
merchants, who, as a class, are not
cut-throats by any means, have offered
a reward of \$500 for the apprehension
of the murderer, thus showing their
proper attitude toward the crime, and
their willingness and desire to see justice
visited upon the criminal. For this
they deserve the same credit that would
be due under like circumstances to
white men.

The World's Fair cinchery desires to
charge Pomona \$12,000 for making a
display covering 12,000 feet of space.

At the rate of \$1 per square foot the
Chicago people who are mismanaging
things on the shores of Lake Michigan
ought to make considerable money out
of the show next year. Wonder how
much it is going to cost us just simply
to stand on the outside of the fair grounds
and think?

PROF. BARNARD has lit onto another
comet with the Lick seeing-machine.
It is about as big as a cholera bacillus,
but is probably less malignant in tone.

We don't know what we can do with a
little kid comet like that, but as Mr.
Barnard has discovered the thing sup-
pose we will have to absorb it into our
system somehow. But why don't Holden
find something?

On Beet-Sugar Machinery.
A citizen of this county has for some
time been in correspondence with manu-
facturing establishments in Germany
and the United States to obtain speci-
fications and prices for a beet-sugar
plant. On the machinery to work up
from 300 to 380 tons of beets per day,
he obtained an estimate from the Mas-
chinenfabrik Grevenbroich, of Greven-
broich, near Cologne, Germany, amount-
ing to \$457,740 marks (\$144,435), and
this involved the building of boilers,
tanks, etc., in America. From the Wal-
burn-Svensen Company of Chicago and
Fort Scott, the estimate on a 300-
ton plant is \$110,000. This makes a
saving in behalf of American manu-
facture of \$4435 on the first price,
aside from freight, etc. It is believed
that the American machinery is in
every respect first-class and fully equal
if not superior to the foreign-made
machinery. This is a strong point in favor
of the protection tariff. It does not
take American manufacturers long,
when they once get a good start, to
reduce the price of manufactured arti-
cles, and thus the consumers, instead of

being taxed for the maintenance of the
"manufacturing bureau," really receive
a bonus for encouraging home in-
dustries. The American people do not
pay too dearly for the luxury of sus-
taining home industries, when, by a few
years of such encouragement, they
place themselves in the way of securing
better articles at a less price than ever
before. All the money which they may
pay in a direct tax is returned to them
many fold in the lessened price of sub-
sequent purchasers, and they have the
stimulated prosperity of the entire
country as an indirect advantage. It
pays the largest kind of a dividend to
stand by home industries.

When Grover was visited by a re-
porter the other day and questioned
about certain matters, he is reported to
have said: "If I have anything to say
I'll write a letter." What a hold that
letter-writing habit does get on some
people. It is really worse than cigar-
ettes or Adia's favorite vice.

The Examiner is evidently hedging
on the Evans-Sontag business, as Allan
Kelly has been given a couple of col-
umns in which to show that the bandits
have not yet sprouted wings, to say the
least. It is all right to be smart, but
there is sometimes such a thing as being
too h. f. smart.

A MOVEMENT is now on foot to revise
the calendar. This will make the week
eight days long, and New Year's will
happen back in December some time.

We move to reconsider. Let's make
the weeks only six days long, so we can
have more days to sleep late.

The Republican demonstration last
night furnished an opportunity for the
corked-up enthusiasm of the campaign

to find full vent. The parade brought
a good many men into line and was
creditable in every way. The visitors
from San Francisco and the Los An-
geles Flambeau Club made an especially
fine showing. Pasadena turned out
well. The meeting at the Pavilion
made an appropriate conclusion to the
whoop-up. The proceedings are re-
ported in full in our local columns.

Mr. SPEARS of Coffeyville has had an-
other job lined out for him. We now
wait to see him draw another bead with
that famous Winchester, and our ears
are wide open for its efficient and mus-
ical pop.

The Pullman Car Company has de-
clared the usual \$2 per share dividend,
but continues to cover its patrons with
those same old pasteboard blankets that
were in use before the war.

CHICAGO is going to have a bigger tel-
escop than the Lick sky-searcher, but it
will cost a house and lot probably to
take a look through it.

AMUSEMENTS.

AT THE PLAYHOUSES.

GRAND OPERAHOUSE.—Tom Yonson was re-
peated to five houses, yesterday afternoon
and last night at the Grand, the play being
received with every indication of satisfac-
tion by the audiences.

POLITICAL POINTS.

Of the two candidates still in the race
for President, Harrison retains the safe
lead. He has been fortunate in possessing
from the start. His supporters are still con-
fident.—(St. Louis Star-Sayings.)

There is no foundation for the idea that
this year will witness any changes in the
safe and wise direction of the affairs of the
country on the principles of good Republi-
can government.—(Baltimore American.)

The vest-pocket vote of the Kansas Popu-
lists for Harrison is going to be a surprise
to everybody. Gen. Weaver is virtually
out of the race, Harrison or Cleveland
will be the next President. Kansas voters
who are for Cleveland will vote for the
Western Capital.

The astute Republicans are quite sure
that Harrison will win, and the astute Dem-
ocratic politicians are positive that Cleve-
land will win. The fact is that nobody
knows anything about it, but the odds are
that the surely Republican States of
1888 are still Republican and the surely
Democratic States Democratic, leaving the
doubtful States of New York and Indiana
still doubtful.—(Milwaukee Sentinel.)

The traditions of the West, especially
those of the slavery and war periods, are
so thoroughly in favor of the Republican
and against the Democratic party, so
strongly in favor of protection as against
a "merely revenue" policy, that there will
be reason for tremendous surprise if any
Western commonwealths, except the silver
States, cast their electoral votes against
President Harrison.—(Boston Advertiser.)

The decline of the people's party is an
encouraging sign in the long run, the
solid common sense of the people can be
trusted to remain true to sound and honest
political principles, and the People's party
can be trusted to the judgment, not the
honesty of voters. Pretending to have
principles. It is usually corrupt and
debauched, and its projects are of the wild,
most disastrous and most ineffective
description.—(Detroit Tribune.)

PERSONAL MENTION.

withdrawn the proviso that she shall re-
ceive it only so long as she remains unmar-

BRIEFLY TOLD.
The most powerful electric light in the
world is in the Hansholm works at the
land, in Denmark, where from the light-
house situated at that place, there is flashed
nightly an electric light of 20,000,000-candle
power.

The sea water originally put in the great
aquarium at the Crystal Palace, Syden-

been used over and over since that date,
and it is parallel in the history of similar
institutions.

It appears that a colored or dark pigment
in the olfactory region is essential to per-
fect smell. In cases where animals are pure
white they are usually totally devoid of
both smell and taste, and some, the white
cat, for instance, are almost invariably
deaf.

This is the curious remedy for cholera
adopted by the Calmucks, who are, it would
seem, special pets of the bacilli. No sooner
does a Calmuck feel himself attacked than
he mounts his horse and makes a ride
the animal for many hours, in fact till it
sinks down from sheer exhaustion.

SAN JOSE, Oct. 15.—[By The Asso-

tween Los Angeles and the Dukes re-
sulted in a victory for the latter. The
Los Angeles team got rattled, and in the
sixth inning McCauley, who is captain-
ing the team during Glenavlin's ab-
sence, took Bals from the box and sub-
stituted Stafford. The change did not
better the team, for the Dukes made
four runs off his delivery. The score:

Bonner's New Speed Sulky.

NEW YORK, Oct. 15.—Robert Bonner, while satisfied that the bicycle sulky is a decided advantage in speed trials, concluded that it is not capable of improvement.

The smallness of the wheels was the objectionable feature. He has therefore had built a bicycle sulky with 42-inch wheels and an axle so arranged that the body of the sulky can be raised or lowered to make a horizontal draft for either a tall or low horse.

The new vehicle is constructed of tubular steel, including the thills, and is both lighter and stronger than the wooden running gear. It is Bonner's intention to use this sulky in Sunol's trial for the world's record.

Hosmer and Gaudaur Win.

ORILLIA (Ont.), Oct. 15.—The double sculling match took place today for \$2500 and the championship of the world on Lake Couchiching between George Hosmer and J. Gaudaur and Edward Hanlan and William O'Connor.

Hosmer and Gaudaur won with apparent ease in 18:31 by about seven lengths.

The Lacrosse Championship.

MONTREAL, Oct. 15.—In the match for the lacrosse championship of the world today the Shamrocks of Montreal won three games out of five from the Capitals, of Ottawa, and carried off the championship.

CARNEGIE'S PLATES.

The Quality of Armour Furnished the Government to Be Investigated.

PITTSBURGH, Oct. 15.—[By the Associated Press.] District Workman Dempsey said today regarding the proposed investigation into the quality of armor plate furnished the Government by Carnegie that a joint committee, composed of members of New York Assembly No. 49 Chicago No. 231, and Pittsburgh No. 3, left the case in the hands of two of the ablest lawyers in New York, who will demand a thorough investigation from Congress of the armor-plates submitted by the Carnegies to the Government.

The belief is prevalent, and seems well sustained, he said, that the inspector passed plates not up to the required standard. If the attorneys are not successful in their appeal to Congress, then the case will be taken into the courts.

HOMES FOR ALL.

The Crow Indian Reservation Opened to Settlers.

A Rush Begun from Various Points in Montana for the New Lands—Kio-was and Comanches Ceding Their Acres.

WASHINGTON, Oct. 15.—[By the Associated Press.] President Harrison this afternoon issued a proclamation opening to immediate settlement the Crow Indian reservation in Southern Montana, aggregating about 1,800,000 acres, ceded to the Government under the agreement of December 28, 1890, as modified by the agreement of August 27, 1892.

Under the terms of the agreement, the ceded lands, except mineral lands, must be disposed of only to actual settlers, under the provisions of the homestead act, except that section 2301 of the Revised Statutes, which gives to ex-soldiers and sailors the benefit of the time they served in the army or navy of the United States; provided, however, that a soldier shall, before receiving a patent for a homestead, pay the United States for the land taken by him in addition to the fees provided by law and within five years from the date of the first original entry, the sum of \$1.50 per acre, one-half of which shall be paid within two years.

It is further provided that any person otherwise qualified, who has attempted, but for any cause has failed, to secure title in fee to a homestead under the existing law, or who has made entry under what is known as the computed provision of the homestead law, shall be qualified to make homestead entry upon any of these ceded lands. It is further provided that all white persons who located upon the Crow reservation by reason of the erroneous survey of the boundary and afterwards were allowed to file upon their locations in the United States land office, shall have thirty days in which to renew their filings. In all cases where claims were located under the mining laws of the United States prior to December 1, 1890, by a qualified locator, who believed that he or she was locating on lands outside the Crow reservation, such locators are given thirty days in which to re-locate their claims within the ceded limits of the reservation.

The ceded lands constitute the western part of the reservation which is opened to settlement, except mineral lands and about 320 Indian allotments, which are reserved, the eastern part remaining in the reservation.

ST. LOUIS (Mo.), Oct. 15.—A big rush to the Crow reservation reported today from Billings, Stillwater and other towns on the railroad. About one-fourth of the reservation can be made very fertile by irrigation. Many homesteaders are waiting to enter the reservation.

MORE INDIAN LANDS SECURED.

GETTYSBURG (Md.), Oct. 15.—The Cherokee Commission has concluded a deal for the surplus lands of the Kiowa and Comanche country after the Indians have been allowed allotments. The Indians are guaranteed \$2,000,000, of which they will receive annually 6 per cent, until the amount is paid. A stipulation in the treaty allows them to appeal to Congress for an additional \$500,000. The land will remain undisturbed until April, 1894, much of it being leased to white men. The treaty is subject to the consent and signatures of a majority of the Indians and then to ratification by Congress. The total area of the reservation is 2,968,893 acres, less 800,000 acres occupied by the Wichita Mountains, which are included besides 12,000 acres of the Fort Sill Military Reservation and allotments to 3000 Indians of 160 acres each. This leaves a public domain furnishing homes for 14,230 families.

THE MONETARY CONFERENCE DELEGATES.

Supreme Court Decision Affecting the Cable Road.

Application for a Writ of Superedeas in the Russel Case Denied.

The Court of the Opinion That the Proceedings are Premature.

Hearing of the Elysian Park "Burro Trail" Injunction Proceedings Continued in the Superior Court—General Court Notes.

The Supreme Court, sitting in bank yesterday, rendered its decision denying the application for a writ of superedeas in the case of E. W. Russell vs. the Pacific Cable Railway Company et al. to restrain Receiver Crank from issuing receiver's certificates for the purpose of defraying the expenses incurred by the receiver of Figueroa street pending an appeal therein, in the following brief opinion:

E. W. Russell vs. Pacific Railway Company, defendants; Dorn & McKee, intervenors.

The property of the Pacific Railway Company was placed in the hands of the receiver, Crank, as receiver. Prior to the appointment of the receiver, the company had been operating a horse-car line in the city of Los Angeles, under a lease from the East and West Los Angeles Street Railway Company, and the receiver, Crank, had taken possession of the line and the receiver's certificates for the purpose of defraying the expenses incurred by the receiver of Figueroa street pending an appeal therein, in the following brief opinion:

The court has done nothing that is far from approved. The contract entered into by the receiver, Crank, and the intervenors, Dorn & McKee, is a contract for the purpose of defraying the expenses incurred by the receiver of Figueroa street pending an appeal therein, in the following brief opinion:

"HARRY BAZARD'S BURRO TRAIL."

The hearing of the application of the Los Angeles Water Company for a permanent injunction to restrain the Board of Park Commissioners from proceeding with the construction of what is known as "Harry Bazard's Burro Trail," through Elysian Park, on the ground that a nuisance is being created thereby, was commenced before Judge Wade in Department Three yesterday, but was not concluded and went over until Monday afternoon.

The plaintiff corporation claims that the city granted to it the exclusive right to sixty-seven acres of land in a canyon for reservoir purposes, and contends that if the defendants are allowed to construct the road as proposed, on the side of the hill and above its reservoir, the refuse matter thereon will be washed down in case of rain into said reservoir, thereby polluting the water. The defendants, on the other hand, contend that the water company is only entitled to the occupancy of that part of the land absolutely necessary for its reservoir, to-wit, about two acres, and claims that the remainder still belongs to the city and that they therefore have the right to construct the road. A number of witnesses were examined for the plaintiff in support of its claims, but the defendants are confident of their ability to show that these claims are without foundation, and that the road will be constructed without further interruption.

Court Notes.

Mrs. Ella H. Brownlee has instituted proceedings to obtain a divorce from her husband, James Brownlee.

Upon motion of counsel for the defendants the hearing of the appeal in the case against Wong Lung, convicted of carrying concealed weapons, was continued by Judge Smith yesterday morning for one week.

The cases appealed by J. F. Beawell, convicted on two charges of having obtained money by means of false pretenses, were heard by Judge Smith yesterday morning, and the judgment of the court was affirmed.

David Beasley was arraigned by Judge Smith yesterday morning upon the charge of burglary preferred against him, and was allowed until Wednesday next in which to plead thereto.

Isaac Dolson, an Englishman, was duly admitted to citizenship of the United States by Judge Smith yesterday morning, upon producing the necessary proof of residence here and taking the requisite oaths of allegiance and obedience, and Judge McKinley performed a like service for Frank Alme, another Englishman.

Judge Wade tried the case of the Providencia Land, Water and Development Company vs. Grace M. Giles, an action to foreclose a mortgage for \$7500, and ordered an interlocutory decree therein allowing the defendant thirty days time within which to pay the amount due, or be forever foreclosed.

The defendant in the case of José Mascarell vs. Jean M. Mollé et ux, an action to foreclose a mortgage on a piece of land in the Elysian Park, having allowed the matter to be by default, Judge Wade yesterday morning ordered judgment for the plaintiff in the sum of \$2993.42 as prayed, and for the defendant Coujet, subject to plaintiff's lien for the amount of his mortgage.

Judge Van Dyke yesterday morning granted the defendants in the foreclosure case of W. F. Hanes vs. C. J.

OFFICE OF THE TIMES.
LOS ANGELES, OCT. 15, 1892.

There ought to be no difficulty in disposing of this year's wheat crop at remunerative prices. Reports made up from official sources show that Great Britain and Italy, crop prospects in Europe average nearly 15 per cent. better than last year.

Italy's wheat crop is 12 per cent. below last year's, and Great Britain's is over 17 per cent. below its normal yield. The condition of crop affairs in Britain is the worst ever experienced. The statistics tend to show that France will require from abroad in addition to its own output an importation of 30,000,000 bushels; Germany will need 12,375,000 bushels; Austria will require 40,000,000 bushels; Greece will need 4,500,000 bushels, and Italy 30,000,000.

It is estimated that the United States will be able to export 10,000,000 to 12,000,000 bushels. Rumania 20,000,000 to 30,000,000 bushels; Servia 3,000,000 bushels and Rosta 40,000,000. It will be seen from these figures that the amount for export in Europe is in round numbers 127,000,000 bushels, while the amount to be imported by the countries whose deficits are given above is 122,000,000 bushels. But the amount of the heavy shipping, Great Britain is not included in the above, and this must largely be made up by imports from America.

PASADENA.

The County Auditor's Report on the Pasadena School District.

Saturday's Happenings Briefly Summed Up—People Coming and Going—The Week's Musical Events—Brevities

Figures bearing on the finances of the public schools are always of interest to the people of this vicinity. The following statement from the County Auditor, furnished the reporter through the courtesy of Secretary Boynton of the School Board of Trustees, of the valuation of this district, together with the several amounts to be raised by the levy of 1892; also a statement of the bonded indebtedness to date, showing the rate for each levy, total rate, etc., will no doubt be carefully scanned by every taxpayer:

The Closing Day of the District Fair and Races.

The Sport Spoiled by Queer Work—A Jockey Seriously Injured by His Horse Falling—The Election Booth—News Notes.

Yesterday was a fine day, and the attractions at the race track brought out about 2000 spectators. It was after 2 o'clock when the first race—half mile and repeat—was called. There were entered Little Hayes, Midnight and Santa Fé. For the race Santa Fé was the favorite, and he was expected to win. The race was a close one, and Santa Fé won by a narrow margin. The jockey, however, was seriously injured by his horse falling, and he was taken to the hospital. The race was a disappointment to many of the spectators, who had expected a more exciting contest.

The Richmond Dispatch says: "The After Dark concert was a success, and the audience was large. The house, lit with gas, was packed from top to bottom, and long before the curtain rang up on the first act standing room was in demand. The excellence of the performance of the performance given last season by this company was the cause of the great gathering, and the favorable impression created there was more than realized by the players who appeared last night. This company will play at the Grand Opera-house next Saturday night."

Sam Dungan's Experience With Eastern Card Sharps.

The following dispatch sent from St. Louis on October 13 proves how four sharpers and four aces beat a baseball player and a quartette of singers.
"S. M. Dungan, of the Chicago Baseball Club, arrived in St. Louis this morning over the Santa Fe, and was met by a party who called upon him. Dungan was told that he was to be arrested for a fellow-passenger. The officer did so and took him to the Four Courts. Dungan said he was on his way to this city, when he was spoken to by an individual, who with three others had boarded the train at Troy, Ill., and had come to St. Louis. Dungan took a hand in the game with the three strangers, and after playing a while one of the three offered to bet that he had a better poker hand than any one in the game. Dungan held four kings, which, of course, were beaten by the dealer, and he bet on them.
The betting continued until Dungan had bet \$50 and had given his diamond ring, valued at \$100, to the party who remained to bet against him. When it came to the show-down Dungan held four kings, and the other party held four aces. The man who held the ring jumped out of the train as it stopped at Highland, Ill., and disappeared. Dungan remained at the hotel until the next morning, when he was arrested and had him arrested when he reached St. Louis. Dungan tried to get a warrant, but the judge refused to issue one. Dungan is now in the St. Louis Jail, and his parents are present residents of this city."

S. B. BLANDFORD, Observer.

An Inebriation Parlor. Dr. Royer has returned to the city and has fitted up every extensive office over the Turkish Baths, No. 230 South Main street. His superior knowledge of all kinds of baths, and having a finely fitted up bath institution in connection with the office, gives him great advantage in the treatment of disease. The arrangement for giving galvanism and electricity to both ladies and gentlemen is excellent. The doctor will open an inhalation parlor upon the same principle as the one used by him at Arrowhead Springs with such wonderful success, as soon as the equipment can be made ready. This treatment is for the cure of throat, lungs and deafness. All chronic ailments, including diseases of women, a specialty. Dr. Royer is co-owner with Mr. Thompson, a physician in charge of the Turkish Baths.

The fact is becoming noticeable that there are more well-dressed gentlemen in Los Angeles this fall than ever known before. There is a better style about the clothes they wear; less of the provincialism that formerly was so apparent to the Eastern visitor. It is apparent that the city has a tailor at last who is "up with the times," and has some taste. The improvement noted has come about in a single season, and the credit for it is due solely to one man—John H. Nelson, the tailor, who a few weeks ago began business at No. 116 North Spring street. He didn't wait for competitors to do—stock up with the latest fashions, but bought the newest things to be had, employed the best of the tailors, and had hands that could do the work. He is turning out work that New York city cannot excel in style, fit or anything else.

Grand rally by the Democratic of the Second Ward. The grandest Democratic rally of the campaign will be held Monday evening, October 17, at the corner of Fremont avenue and Temple street. The following named candidates and gentlemen will be present and address the audience: Gen. John R. Matthews, Clarence Miller, Hon. W. H. Workman, Dr. E. Bryant, M. E. Snyder, T. E. Rowan and others. A band of music will be in attendance. Everybody is invited to turn out and hear the principles of Democracy discussed.

The show window at No. 327 South Spring street is a center of attraction at present, but the display in this line is not the only one. The standard Rotary Shuttle and White sewing machines are to be seen in a variety of woods. Williamson's Music Store, No. 327 South Spring street.

Five dollars for the round trip to San Diego on Saturday and Sunday, tickets good returning Monday. This will give you plenty of time to visit the city by the bay. Trains leave First street station at 8:15 a. m. and 3:05 p. m. (Santa Fe route).

We call special attention to the large line of new mouldings just received. They are unexcelled, both in design and finish. Also the line of Silverline frames and mirrors for the ladies' toilet and gentlemen's shaving glasses. Sanborn, Vail & Co., No. 133 South Spring street.

Mr. Z. Reed, proprietor of the Russ and Reed House, is taking the large line of benefit of the Branches Hot Springs, combined with business and attending to his property in San Jacinto and seeing old friends, where he has many.

INSURANCE MEN DEFEATED.

The Redondo Ball Club Won Yesterday—Standing of the League Clubs.

Los Angeles..... 59 36 23 .410
Oakland..... 58 34 21 .471
San Jose..... 58 27 31 .464
San Francisco..... 58 26 31 .448

The insurance team beat a combination composed of the Tufts-Lyons, University and one or two from the Redondo ball teams, yesterday afternoon in a hotly contested game, resulting in a victory for the latter aggregation by a score of 13 to 9.

The opposing pitchers, Bentley for the Tufts-Lyons, Coby and Glenavlin for the insurance team, did good work, especially that of Glenavlin, whose wonderful snake curves paralyzed the batters as well as the grand stand. The game was lost through the seven errors of the first baseman of the insurance team, one of his errors in the second inning costing seven runs.

The Silver Stars defeated the Behinders yesterday by a score of 15 to 3. The young Tufts-Lyons defeated the Cyclones yesterday by a score of 9 to 0.

The Tufts-Lyons Club goes to Redondo this morning to play game of ball, and expect to add another scalp to their string.

Los Angeles have not lost a series for eight weeks and much interest is felt here in the "rubber" to be played at San Jose this afternoon.

Next Thursday's game between the Angels and Colonels will be a benefit game for Capt. Moody, the gate-keeper at the park.

Gapes in Chickens. (Farm and Fireside.) I see frequent inquiries for a remedy for gapes in chickens and will say that the man or woman who will put a straw or feather or horse-hair down the windpipe of a chicken to remove the worms ought to have one put down their own throat, and see how they would relish such barbarity. So simple a remedy as camphor will cure them. If those who have chicks troubled with the gapes will take gum camphor, and as soon as they see and hear any of their chicks sneeze, give them a chick with the gapes in that time, so that I am positive it will cure very bad cases if persevered in. That is the only disease we are ever troubled with among our fowls, and we always keep from sixty to one hundred every winter, and raise a good many chicks in the summer with the brooder, hatched by hens. I would like, should any one try this, for them to report the result through Farm and Fireside.

OF INTEREST TO ADVERTISERS. J. H. Wallace, who has had a large experience in the same line in Chicago, has opened an advertising agency in this city. This is a business for which there is no doubt, here in Southern California, a good field, and merchants and others who desire advertising space will find it a good business for the largest expenditure of money, trouble and time will not be long in "catching on." An advertising agency in these times is a very convenient thing to have, and with rapid transit, telephones, etc. Through them an advertiser is enabled to make a contract for such advertising as he wants with a dozen or a hundred papers as easily as he can with one, and at the same time save himself considerable trouble and expense. Mr. Wallace at present receives advertising for about all the papers published in Southern California, dailies as well as weeklies, and will soon add to his list those of Arizona and Texas. He has on his list four hundred and thirty papers, and an advertiser can have a one-line advertisement in the entire number one month for an average of less than \$1 for each. In fact, when a contract is made for larger space and longer time the figures are 25 per cent. less than this. The advertiser is not obliged, however, to go into all the papers. He can select such as he pleases, and the charge will be accordingly. Mr. Wallace comes to Los Angeles with good credentials and is highly recommended as a reliable and trustworthy man. His office is at No. 124 1/2 South Spring street.

Yesterday the output of sugar from the factory which is now in process of being built at the Los Angeles Sugar Co. reached 6,000,000 pounds, over 2500 tons. The average daily output for September so far has been 104,878 pounds.—[Chicago Champion.]

Marion Harland endorses and uses Cleveland's Baking Powder.

February 5, 1892.

After long and careful trial of others, I prefer Cleveland's Baking Powder for several reasons.

Cleveland's is a pure cream of tartar and soda mixture, not containing alum or ammonia or any other substance deleterious to the human stomach.

Cakes, muffins, biscuits, &c., in which Cleveland's Baking Powder is used, keep better.

A like quantity of Cleveland's Baking Powder goes further and does better work than any other of which I have knowledge. It is therefore cheaper.

MARK THE MAGIC PRICES

MUTUAL are the benefits that arise when merchants have a care for their patrons. Much good can be done on both sides. The values can be offered that are beneficial to the one, and good will and patronage can be shown by the other. We are ever on the alert to place wares down to the lowest level of value—this probably accounts for our immense patronage and magnitude of our store space—three times larger than any other—most likely three times more goods are being sold, and surely lower prices; more accommodation and better system than elsewhere. Extensive improvements are constantly in progress. Our store now reaches to Franklin st. at the rear. More room is the constant cry; more goods are being sold; more patrons are coming to us. Of this we are certain.

Queen Marguerite of Italy recently arrived in a town where great preparations had been made to do her honor, and she offered some lunch, declined it and that all she needed was a glass of water. The water being brought, she drank it and was about to take her handkerchief from her pocket in order to wipe her lips when the mayor, misinterpreting her as having bowed respectfully and said: "Your majesty need not trouble yourself, I can assure you that the lunch is all paid for."

VALUED PRIZES!

THE FIRST OF ABOVE TWO WHICH NOW ADORN THE FRONT OF DR. WONG'S SANITARIUM, WAS PRESENTED BY CHIN POK KEE, A MEMBER OF THE FIRM OF THE NING YOUNG CO., WHOSE TESTIMONIAL IS AS FOLLOWS:

For a long time I was greatly troubled with my kidneys, with a raging fever, I tried various doctors, but could obtain no relief. At last I was given up by my friends and decided to return to my native country, where I was staying temporarily for five days. I was taken to HUI WONG, whose first dose of medicine brought me to consciousness, and within a few days I was cured.

CHIN POK KEE, a native of Sen Ning District, China.

The prize represented by the second cut above is a token of appreciation from WONG HO WONG, who has been cured of his kidney troubles.

For a number of years I was troubled with my stomach and bowels, and after growing constantly worse for a long time inflammation set in, which terminated in tumor of the bowels. None of the many physicians consulted were able to afford me relief until after I had been treated by Dr. WONG. At this time my stomach had grown to three times its natural proportions, and mine was considered a hopeless case. After talking briefly with the doctor, I had time to reflect on the various medicines I had taken for the disease. The first dose I took produced a greater effect than all the medicines taken before put together. After four short weeks of treatment Dr. Wong has entirely cured me, and today I am a

we are dividing the profits with you on our fifty-cent line of all-wool dress goods; nearly two hundred different styles to select from—they are copied from high-class french novelties; they will wear as well as most dollar goods; the styles are fully equal to still higher-priced goods—it is our way to increase trade in the dress goods department; we give you better values than you will find elsewhere for the same money.

we are doubling up trade in the cloak department; already equal to the combined sales of all the cloak houses in the city—special attention is directed to the five-dollar, eight-dollar and ten-dollar line; unusual bargains at these prices—cloaks at \$12.00, \$15.00, \$18.50 and \$20.00 takes in a range of high-class novelties of extra values and first-class styles—in the higher-priced goods we show a grand line of novelties, one or two of a kind and with nearly one thousand garments to select from.

100 dozen ladies' imported pocketbooks and purses 25c each—one of the greatest bargains we have ever offered; they will be on sale monday; finer pocketbooks and purses 50c each; this is a special importation of our own, and they are very cheap.

"a large number"

of inquiries have been made about the doll contest, and some do not seem to quite understand the conditions—any little girl under 18 years of age can compete; the verses are to be recited either to the teacher or the superintendent of the sabbath school; the superintendent will be required to certify as to the number of verses; the verses may be recited all at one time, or the time may be divided up in any way the superintendent of the sabbath school may decide—we think it would be unfair to have the child learn and recite the verses all at one time; it would be too severe a strain upon the child's mind and she would be more liable to lose interest—the idea is to offer premiums to encourage the little ones to do good work, and by learning and reciting the verses weekly it does seem more good would be accomplished—however, that will be left to the good sense of the superintendent; the only restriction we place upon the prizes is: "to the girl under 18 years of age learning and reciting the largest number of verses out of the bible, a doll worth \$30.00 will be presented; the second largest number a doll worth \$25.00 will be given, and to the third largest number a doll worth \$20.00 will be given; and to the sabbath school carrying off the first prize a cash prize of \$50.00 will be given for the benefit of their library, to be used for the purpose of buying books and for no other"—there is no buying of goods, no lottery, but a square out-and-out contest—we believe the three little girls carrying off these prizes will never forget the very happy times they had in working to secure these handsome dolls, and the first prize will be a great aid to the sabbath school—we hope to see a large number compete.

of our mammoth cloak department—it is the largest in all this city—cloaks \$2.50, \$3.00, \$3.50, \$5.00; any of them are worth double the money—cloaks for \$6.00, \$8.00, \$10.00, \$12.00, \$15.00, \$18.50—here is where the assortment is very large; finer cloaks for \$20.00, \$22.50, \$25.00, \$27.50, \$30.00, \$35.00, \$37.50—one of a kind, and nearly 500 different styles to select from—children's cloaks \$2.50, \$3.00, \$3.50, \$4.00, \$5.00; ages 4 to 12 years—misses' cloaks \$2.50, \$3.00, \$3.50, \$4.00, \$4.50, \$5.00 up to \$22.50.

"the largest line to be found anywhere."

—we aim at completeness in this department.

"all-wool dress goods, 36 inches"

—wide, extra good quality, 40c a yard.

"sale of cloaks"

—\$2.50, \$3.00, \$3.50, \$5.00; guaranteed worth double—the largest cloak department in all this country.

—ladies, do you know broadcloths are one of the most fashionable dress fabrics this season; new york, chicago, philadelphia and boston advertisers all quote broadcloths as one of the great articles for ladies' dresses this season; our broadcloth stock is very large; they make up elegant and rich for tailor-made costumes; new russian band and fur trimmings suitable for trimming broadcloths.

"It is no longer an experiment about saturday night's closing; it is true we lose a couple of hours' trade"

—but we save the health and ambition of our clerks—they appreciate this, and are all the better for the rest; they sell more goods during the week; there is no room for them to complain in any way; they all work for a living, and their work is given freely when it is appreciated—in talking with a man a short time ago he made the statement he had worked for over 20 years for a wholesale house he is now engaged with, and during all that time not a member of the firm had ever said they appreciated his services; he said they had never complained, and for that reason he supposed they were satisfied; here is a mild sort of brutality—we believe in saying a good word to our salespeople, and we believe they appreciate it; a girl working in the kitchen appreciates a kindness from the lady of the house, and she is entitled to it; because a girl works in the kitchen it does not degrade her; they are earning an honest penny; if not, why are they kept; ladies complain of not being able to keep good help; perhaps good help would prefer to work for some one who is a little more thoughtful; some men can manage help without friction; others are spoiling for trouble every minute in the day, and they always have it; it is not always the help who are at fault—a great many of the strikes come from a domineering foreman who lacks discrimination; a good foreman commands respect, and he is entitled to it; an overbearing foreman commands hatred, and is a loss to his employer every day he works; a mean, domineering foreman may have the gift of gab, but lacks brains to carry it through—we had a foreman at one time who made it a point to bulldoze and domineer, and invariably said it came from headquarters, when headquarters knew nothing about it, and the employees were afraid to come to headquarters for fear this domineering fellow was right in his manners; this was blackmail pure and simple, and when once found out it took five minutes to settle it—we manage our own business and our own help, and there can be no friction in any way, and there is none; the employer and employee are working together in harness, and we each one do our own pulling, but the pulling is all in one direction; we talk matters over and find out all the weak places, and we then put putty in the cracks and gloss them over and they look as good as new—common sense ideas; this has given us the largest trade ever done by a dry goods house in this city; the increase has been phenomenal; we are putting in more new hands this week; we have been adding to our help right along; we have good help; the very best; they are all workers and do their full duty in every way; it is encouraging for us to say this—one gentleman said he thought it would give the employees the big head if we complimented them; on the contrary they work all the harder and endeavor in every way to please the trade; our salespeople wait upon trade right; they show goods freely; they give samples freely—it makes no difference whether you are a looker or a buyer, you get good treatment, and you should—you hear more about this house, you see more bundles on the street, and you see larger crowds here than in any other house in the city.

cloaks for old ladies easy to get off

—and on; moderate in price, and the assortment is very large—extra sizes in 44, 46, 48 and 50 inch bust measure—we can fit the largest lady; we do not show a small, broken assortment of cloaks.

"one price"

—you are safe upon this plan—when you deal with a house that will deviate in prices—do you know when you get cloaks at the

"right prices."

—visit our mammoth cloak department; good treatment, no urging to buy, nothing said against any competitor, no running down other's goods; we attend strictly to our own business, and are today doing more cloak business than all the cloak houses combined.

"our cloak department"

—is known far and wide.

"the big dress"

—goods department is doubling up trade—the trade of this house is showing a tremendous increase; we are on the top now—saturday-night closing; liberal treatment given all employees—is it any wonder the trade is growing so great and so grand.

"out on the hills"

—where it is so fair they drink old water that is filled with hair; it smells like an egg that is thirty days old and tastes like a rag that was second-hand sold; there is now cholera in that old ditch and it is ten times worse than the seven-year itch; the germs of fever are planted there in that nasty old ditch that is filled with hair; the cattle stand in the water we drink and the hogs wallow there until stinks the goose swim around in this water with ease and we drink it afterward filled with disease—in this ditch a few chinamen wash; we feel like killing them, we do, begosh—typhoid fever and diphtheria are there in this frightful old ditch that is filled with hair; in this ditch are bugs and worms, as well as a large amount of cholera germs—what a terrible tale we here unfold, and yet the one half remains untold; it stands out today as the greatest disgrace this city was ever called upon to face; it is neither decent, right, or fair to compel the people to drink this nasty old water filled with hair—let the cholera come, as it may next year, how many people will it catch by the ear!—before saving too much about cleaning up back yards, against this nasty, filthy old water, be on your guard—before any citizen says one word against voting bonds for the city to own and operate its own waterworks ask any citizen upon the hill about the vileness of this water, and if this is not enough take a horse and go out over the ditch; this will convince any one of the great necessity for a change and a change at once.

"ladies' extra heavy jersey-ribbed vests 50c each"

—worth 75c, and they cannot be duplicated elsewhere for less than 75c—

"ladies' all-wool dress patterns"

—in rough effects, \$2.75 for suit.

—infants' complete outfits in our muslin underwear department; infants' lined and unlined baskets; new silk baby caps.

"the beautiful styles in dress goods"

—are here; the quantity and variety is most complete; the cheaper the goods the more beautiful the styles it seems this season; it is looking into merit for wear as well as style, and this predominates all through the stock; the

50c

—line is gorgeous in variety, two hundred different styles from which to make your selections, and then you hardly see the infinite variety until you see the 40c line—here is another strong point; strong points predominate all through the dress goods department.

"black goods at a dollar a yard!"

—over a hundred different patterns at a dollar a yard in black dress goods—everything is shown here; black dress goods at a dollar a yard here; some sell them for \$1.50; we even up the profits and gain trade by so doing; it is good talk and a large trade at a smaller profit where the money is made—you know by this time the trade of this house is showing the largest gains ever made by a dry goods house in this city—we close saturday nights at 6 o'clock; a strong point in our favor.

"best dollar velvet in the market"

—we ask you to compare it with any velvet for \$1.50 a yard.

—ladies' fast black hose 16½c; 3 pair for 50c; 6 pair for \$1; absolutely fast black; guaranteed not to crack.

"attend the great zephyr sale monday at 9 o'clock"

—3c an ounce; all shades; single, split and double zephyrs.

"we have secured"

—200 more japanese glove boxes, inlaid; monday we give them away to every purchaser of a pair of kid gloves at \$1.00, \$1.25, \$1.50, \$1.75, or \$2.00 a pair; they are on display in our big show windows—our way to introduce

"p. & p. kid gloves"

—and by the way, do you know what p. & p. stands for!—it don't stand for peeling potatoes, because ladies don't peel potatoes with their kid gloves on—the gloves are good and they are good in more ways than one; they fit finely, they wear well, and the colors are the best you ever saw; and you don't pay a cent more for them than you do for inferior gloves, and besides monday we give you a

"glove box for nothing! 9 o'clock."

"new chatelaine bags 25 cents"

—each.

"lunch baskets 25c;

"shopping baskets 25c."

—ladies' full size black-grained, leather, nickel fasteners, chatelaine shopping bags 50c each; compare them with dollar goods elsewhere; small size chatelaine bags 35c; same as the 50c grade only smaller in size.

MAPS OF AMERICA.

The Columbus Exhibition in Paris.

How Early Cartographers Represented the New World.

Great Collection of Maps of the Western Continent.

In the Bibliothèque Nationale of France—How Imaginative Supplied the Deficiencies of Exact Knowledge.

Special Correspondence of The Times.

PARIS, Oct. 8.—If you ask the ordinary general reader which is the largest library in the world he will almost invariably tell you the British Museum. Only a few months ago that entertaining gossip, the Lounger of the Critic, called attention to the fact that not the British Museum, but the Bibliothèque Nationale of Paris had the largest number of books on earth. The claim was right. The figure given to prove it, "upwards of 3,000,000," were questionable, but about as near as the librarians themselves in the Bibliothèque Nationale can come. They only shrug their shoulders despairingly when you ask them about the number of books. Nobody knows, though it should be said that the administration is trying its best to find out. The latest figures which are authoritative, give 2,200,000 printed volumes.

But the Bibliothèque Nationale contains something besides books. It owns a collection of nearly 100,000 manuscripts, a collection of 150,000 medals, nearly 2,500,000 engravings, woodcuts, etc., and the finest lot of maps relating to the early history of America which can be found in the world.

The happy thought of celebrating the 400th anniversary of the discovery of America by exhibiting these maps, occurred to somebody some months ago. In matters of exposition, to propose is to carry out. In France, and today all these ancient treasures are open to public gaze. Not only those of the library, but also those of the national archives of France, the departments of war, marine and foreign affairs, and a few private French collections have been drawn upon for their treasures. The result is without doubt the most complete and valuable collection of maps referring to the early history of the American continent which it would be possible to get together in any country of the world.

An exposition of maps may seem at first thought a rather slow way of celebrating so great an event as the discovery of America. It is true it lacks several qualities supposed to be necessary to celebrations—fireworks and brass bands, for instance; but it does not lack in value, and that is something. It is not only the experts who will find the exhibition absorbing; the popular observer who goes to merely be amused will, if he gives his attention, find in it enough of the marvelous, the strange, the grotesque to entertain as well as instruct him.

The oldest map in the collection is a parchment dated 1413. The great American continent receives no attention here, though fabulous islands fill in the western waters. In the next oldest member of the exposition, the globe of Martin Behaim, dated 1492, even the fabulous lands have disappeared, and from Europe to Japan there is only a vast ocean. A downright feeling of humiliation comes over an American in looking at these two old maps. That profound belief that he entertains, and does not hesitate usually to announce, that America is the biggest thing on earth, and that no other people can lay a claim to the Americans, receives a thrilling rebuke in the presence of these two quiet proofs that there was a time not so very long ago when his vaunted country was, so far as civilization was concerned, absolutely unknown.

But America is discovered, and all mapmakers begin to fill the old world with a will; 1502 is the date of the oldest map bearing coast lines—only coast lines to be sure—the Americas, Newfoundland and the north angle of Brazil; but they meant great things to Europe, gazing at that map. In 1513 we find Greenland hanging from the side of Asia. In 1532 the maps carry out Columbus's idea that the he knew had reached were only a continuation eastward of Asia. Those historians who hold Columbus guilty of having suggested that America was really a part of Asia should examine these early maps. It is the first time that the Americas are shown as a continent, and they have gathered from the natives that there was a vast land westward. What more natural supposition than that it was the coast of Asia they had reached?

The map of the world used by Sebastian Cabot (1544) is one of the most interesting in the collection. As the figure here given shows, Cabot had a very fair notion of the southeastern half of the United States, but he knew so little of the west that he did not even try to guess its relations to Asia. Cabot, like most of the early mapmakers, used his imagination when his facts gave out, and he peopled both continents with fabulous beasts, grotesque birds and more or less sanguinary scenes from the native life.

It will be noticed on Cabot's map that South America is well defined at a period when North America is a mere fragment. Indeed, the attention that the southern half of the continent receives from all the earliest mapmakers is rather irritating to a loyal resident of the United States. The consideration that Europe gave to South America in its earliest days did not end here. The country is today better known by far in Europe than in the United States. To be an American, according to our idea, is to be a member of the great republic. Not so in Europe. You are called upon to define whether you are from North or South America. The shock the average New Yorker or Chicagoan receives on being asked if he is from South America is something like what he would feel if asked if he were a savage.

Although these early maps gave a good outline of the greater half of the new world, they were far from correct regarding the interior. The Amazon River is a big stream, no doubt, but if it took the proportions, in reality, which the maps gave it, there would be little room for Brazil to pursue her revolutions in. When a sixteenth century mapmaker gave all the space he conscientiously could to the Amazon and the Andes, he filled in the vacant spaces with thrilling pictures of the killing, quarreling and roasting of a human being. These maps, it may be

superfluous to observe, were not sent out by the colonization companies. The land organizations of those early times understood perfectly how to get up a circular. An excellent example of this is on a map dating probably from the end of the seventeenth century, and issued by the American Company. It sets forth the charms of the island of Cayenne in the following terms:

"The island of Cayenne is doubtless the most delightful of all the islands of America, and the most profitable to cultivate. Persons who are without money will be carried there free of charge by the company's boats and will be furnished with food until their work and the lands which they cultivate yield them enough to pay for their passage and sustenance."

Another circular declares of this same island:

"In this happy land there are no taxes, duties or tributes. One can live without being cheated or terrorized. Fear is banished. Women come and go without danger. Men obey the laws of nature. All are content."

When North America begins to grow on the maps its progress is rapid. Each year the proportions become a little more exact. The St. Lawrence loses the astonishing breadth the first explorers gave it and gains in length. The bays take shape. The rivers elongate. The mountains appear. The seaboard towns are marked in. The vivid green trees, the astonishing savages swinging in hammocks or dancing a war dance, and the extraordinary beasts disappear to give place to the data which the explorers of the interior gradually bring back.

For a long time this interior is much more troublesome than the coast ever was. Something of the mysterious fascination which those unknown lands must have had for the explorers of those days, whether adventurers or devoted missionaries, is communicated to the student of the charts. But it is slow work. For years the Mississippi hangs dangling in mid-country—a river without a mouth. Several cartographers try to carry it to the Gulf. One unwilling to commit himself runs a dotted line from the point at which all knowledge of the river ceased, to the Gulf, to indicate that possibly that might be the solution of the mystery. Another unwilling to admit ignorance ran the river out into Colorado and then turning it on its tracks carried it off to the Gulf. The student heaves a sigh of real satisfaction when at last the uncertainty is over and he finds the great stream properly conducted.

The great lakes caused a multitude of wild conjectures. The Indians told marvelous tales of the "great waters," and not content with the five lakes of which they knew something, they add on the maps of 1688 and thereafter four more immense sheets of water north of Superior and west of Hudson's Bay, and connecting with these bodies by a system of rivers, which, if it existed, would assure the commercial future of British America. Even at the date of these maps, a coach line for boats from the site of Buffalo through Lake Erie, Olatonochiketo Lac (Lake St. Clair), Lake Huron and the Lac des Illinois or Michiganway to Fort Chicago. The map tracing this course, (1788) is the first in the collection to mention Chicago.

The cartographical debut of more than one great city was such that its oldest resident wouldn't recognize it today. Who would think of knowing to Janeiro under the name of Genero, or New York, when its site is marked only by two Dutch windmills?

Many reflections are forced upon the American who, beginning with the globe of 1492, before the earth has appeared on the face of the earth, fingers the very collection of titles and orders that Christopher Columbus himself used to handle, and then traces dot by dot and line by line the growth of the western world. Perhaps the feeling which takes the greatest hold upon him is his wonder that we of the United States are not a French, a Spanish, or an English people; that we are, in fact, ourselves, an individual nation, with a government, a genius, a literature, and aim quite original and well-defined. The sequence of the events of the last 400 years seems incredible when looked at from the standpoint of one of these early maps. But the surprise is healthy. It sends one back to America more reverential and as a consequence a little better able to discharge the duties of citizenship.

Some time ago the Saturday Review suggested that the United States could do well to honor the memory of Christopher Columbus by a chronological atlas, reproducing the old maps which illustrate the history of discoveries in the new world. It will be a great mistake if some measures are not taken to reproduce the collection now open in the Bibliothèque Nationale. The result would be of untold value to American historical research. If the money does not come in any other way it might be wise to devote to the atlas some of that which otherwise will be spent in blowing bubbles next year in Chicago.

IDA M. TARBELL.

A Deafened Democrat's Lament.

O. Wellborn. Kunnel Wellborn. To-day I am a deafened man. Don't let that iron jaw of yours. Don't let it have full play.

We mean to vote your ticket. Because you're from the South. But for the Lawd's sake, Kunnel, Stop running at the mouth.

We've heard you roar all morning. We've heard you yawn at night. Tomorrow you'll be seeking That jaw with all your might.

We know the tariff's evil. We feel its throttling grasp. But it's not the tariff, Kunnel, It's you that makes us gasp.

O, quit while yet the voters Are awake within the hall. Don't think they'll stay forever, To hear that caterwaul.

No wonder, come to think it. On your nomination day The band that went to meet you, The Jawless march did play.

California Brandy.

[California Fruit Trade Review] The total output of brandy in California for 1891 was 1,900,000 gallons, of which about 600,000 gallons were used in fortifying sweet wines, leaving 1,300,000 gallons to go upon the market. Of this amount 432,851 gallons were shipped by sea and 840,495 gallons by rail. During 1890 the total shipments of brandy by sea and rail were 611,706 gallons.

It is said that the Fresno raisin-growers' combine has over-reached itself. The scale of prices fixed was such as to encourage the importation of foreign fruit, and Eastern dealers are stocking up with Spanish raisins, which are generally preferred on the Atlantic coast at the same price. Combination is a good thing, but it isn't always safe to start in too strong on demands.—[P.O.]

\$5.50 Fine calf, \$5.25 and \$5.00 Work-

\$5.50 men's shoes will give more wear for the

\$5.50 money than any other make. They are made for ser-

\$5.50 vice. The increasing sales show that workingmen

\$5.50 have found this out.

\$5.50 Boys' shoes are worn by the boys every-

\$5.50 where. The most durable shoes made at the price.

\$5.50 Ladies' \$3.00 Hand-sewed, \$2.50.

\$5.50 \$2.50 and \$2.00. They are very stylish, comfortable and

\$5.50 durable. The \$2.00 shoe equal custom made shoes costing

\$2.50 to \$3.00. Ladies who wish to economize in

\$5.50 their footwear are finding this out.

\$5.50 Caution.—W. L. Douglas and the price is

\$5.50 stamped on the bottom of each shoe; look for it

\$5.50 on the tracks carried off to the Gulf. The student

\$5.50 heaves a sigh of real satisfaction when at last the un-

\$5.50 certainty is over and he finds the great stream properly

\$5.50 conducted.

\$5.50 The great lakes caused a multitude of wild con-

\$5.50 jectures. The Indians told marvelous tales of the "great

\$5.50 waters," and not content with the five lakes of which

\$5.50 they knew something, they add on the maps of 1688 and

\$5.50 thereafter four more immense sheets of water north of

\$5.50 Superior and west of Hudson's Bay, and connecting with

\$5.50 these bodies by a system of rivers, which, if it existed,

\$5.50 would assure the commercial future of British America.

\$5.50 Even at the date of these maps, a coach line for boats

\$5.50 from the site of Buffalo through Lake Erie, Olatonochi-

\$5.50 keto Lac (Lake St. Clair), Lake Huron and the Lac des

\$5.50 Illinois or Michiganway to Fort Chicago. The map tracing

\$5.50 this course, (1788) is the first in the collection to men-

\$5.50 tion Chicago.

\$5.50 The cartographical debut of more than one great city

\$5.50 was such that its oldest resident wouldn't recognize it to-

\$5.50 day. Who would think of knowing to Janeiro under the

\$5.50 name of Genero, or New York, when its site is marked

\$5.50 only by two Dutch windmills?

\$5.50 Many reflections are forced upon the American who,

\$5.50 beginning with the globe of 1492, before the earth has

\$5.50 appeared on the face of the earth, fingers the very col-

\$5.50 lection of titles and orders that Christopher Columbus

\$5.50 himself used to handle, and then traces dot by dot and

\$5.50 line by line the growth of the western world. Perhaps

\$5.50 the feeling which takes the greatest hold upon him is his

\$5.50 wonder that we of the United States are not a French,

Furnishing Goods!

Now's the time to "shake" your light-weight underwear.

Being sole agents for Los Angeles of Dr. Jaeger's Medicated System Underwear and several other celebrated makes, we are in position to name Lower Prices for fine and medium grades of Hosiery than any other competing house on the Pacific Coast. If you require Shirts, Underwear, Collars, Cuffs, Neckwear, or Hosiery, don't "tarry by the roadside," but come direct to headquarters and save all the profits of middle dealers, who are obliged to sell on a big margin of profit.
